UNIVERSITY PHILOSOPHY
The University serves the INDIVIDUAL by providing the student with a nurturing environment for optimal human flourishing. It serves the community by offering programs responsive to individual and social needs.

VISION
CSU is a University with global stature in the arts, culture, agriculture and fisheries, the sciences as well as technological and professional fields.

MISSION
Cagayan State University shall produce globally competent graduates through excellent instruction, innovative and creative research, responsive public service and productive industry and community engagement.

SYLLABUS IN IT122- INTRODUCTION TO HUMAN COMPUTER INTERACTION

Course Credits	**3**	**Semester**	**Second**	**School Year**	**2024-2025**	**Number of Lecture Hours**	**54**
Pre-requisite/s	**NONE**		**Co-requisite/s**	**NONE**		**Number of Laboratory Hours**	**0**

Course Description:	The Human Computer Interaction is an interdisciplinary field which covers the basic theory and methods in examining design and evaluation of human-computer interactions. The emphasis is to train students to the development process for user interaction designs as an integral, but different, part of interactive software development, helping them realize that user interface development is an ongoing process throughout the full product life cycle, and developing the human computer interface is not something to be done at the last minute. In addition, the course deeply involves the student with a real problem solving/software development project from functional requirements and problem identification to forming a solution and presentation of this solution.
Intended Graduate Attributes(IGA's)	The Cagayan State University aims to produce graduates who will exhibit: **Competence** • critical thinker • creative problem-solver • competitive performer regionally, nationally, and globally **Social Responsibility** • sensitive to ethical demands and compassionate particularly to the marginalized • steward of the environment for future generations while championing development and socially just and • an advocate of economic and social equity **Unifying Presence** • uniting theory and practice • uniting strata of society • uniting tradition, and innovation • uniting the nation, the ASEAN region and the world and uniting the University and the community
Course Intended Learning Outcomes(CILO's)	**At the end of the course, the students should be able to:** **CILO 1:** Analyze different user populations with regard to their abilities and characteristics for using both software and hardware products.(***IT02,IT03,IT04,IT05,IT06,IT07***) **CILO 2 :** Evaluate the design of existing user interfaces based on the cognitive models of target user. (***IT02,IT03,IT04,IT05,IT06,IT07***) **CILO 3:** **(ON IZN)**Students will learn strategies to adapt user interfaces to meet the needs and preferences of global audiences,considering factors such as language, symbols, and design aesthetics.(***IT04***) **CILO 4:** **(ON SGD's)**Students will learn to identify and address gender biases and stereotypes in HCI design, internalizing strategies to create more equitable and empowering user experiences.(***IT04***)

Grading System		Percentage Distribution
	Assigned Activity	15%
	Engagement/Forum	10%
	Quizzes/Unit Test	30%
	Major Examination	45%
	TOTAL	100%

Time Frame	Learning Content	Intended Learning Outcomes (ILOs)	Teaching and Learning Activities (TLAs)	Learning Assessments	Teaching and Learning References/ Resources	Modality
Week1	**Class Orientation** 1. Getting to know each other 2. Overview of the course 3. Grading System 4. College and University policies **Statement of the Vision, Mission, Goals and Objectives** 1. Ambisyon 2040 2. University Vision and Mission 3. College and Program ILO 4. University and Campus Officials 5. Student Policies	At the end of the session, students are expected to: A. • Familiarized with the University and College Policies • Identify campus and university officials • Discuss the overview of the course • Familiarized with the grading system and course requirements B. • Described the Ambisyon 2040 • State the University Vision and University Mission • Explain the college and the program ILO • Identify the University and	• Discussion • Audio-Visual • Presentation of Designated Officials	• Oral recitation • Written Test • Class Interaction	• University Manual • Student Handbook University and Campus organizational Chart	Hybrid

		Campus officials • Know the student policies				
Week 2-3	**1. Foundation of Human Computer Interaction** a. Human Capabilities b. The Computer c. The Interaction d. HCI Paradigms	At the end of the session, students are expected to: • Explain the capabilities of both humans and computers from the viewpoint of human information processing; and • Describe the typical human computer interaction (HCI) models, styles, and various historic HCI paradigms. (***IT02,IT04,IT05,IT06,IT07***)	• Oral Presentation • Buzz Session • Demonstration	• Oral recitation • Quiz • Research Activity & Presentation of Output	Julie A. Jacko and Andrew Sears (2019), "The HCI Handbook: Fundamentals, Evolving Technologies, and Emerging Applications" Information Resources Management Association (2018), "Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications" Online Modules/LENS Laptop Projector Laboratory Room Library	Hybrid
Week 4-5	**2. The Design Process** a. Interaction Design Basics b. HCI in the software process c. Design Rules	At the end of the session, students are expected to: • Analyze and apply an interactive design process and universal design principles to designing HCI systems; and • Describe and use HCI	• Oral Presentation • Buzz Session • Demonstration	• Oral recitation • Quiz • Research Activity &	Julie A. Jacko and Andrew Sears (2019), "The HCI Handbook: Fundamentals, Evolving Technologies, and Emerging Applications" Bill Moggridge (2018),	Hybrid

	d. Universal Design	design principles, standards and guidelines. (***IT02,IT04,IT05,IT06,IT07***)		• presentation • Seatwork • Presentation of Output	"Designing Interactions" Modules/LENS Laptop Projector Laboratory Room Library	
Week 6	**PRELIM EXAMINATION**					
Week 7-8	**3. Implementation, Evaluation and User Support** a. Implementation Tools; b. Evaluation; and c. User Support	At the end of the session, students are expected to: • Analyze and Identify user support; • Evaluation of implementation tools and user-support; and • Plan and Implement the best tool. (***IT02,IT03,IT04,IT05,IT06,IT07)***	• Oral Presentation • Demonstration	• Research Activity & presentation of Output	Bill Moggridge (2018), "Designing Interactions" Dan Saffer (2018), "Designing for Interaction: Creating Innovative Applications and Devices" Online Modules/LENS Laptop Projector Laboratory Room Library	Hybrid
Week 9-11	**4. Models and Dialogues** a. Cognitive models b. Socio-organizational issues and stakeholder's	At the end of the session, students are expected to: • Analyze and Identify user models, socio-organizational issues, and stakeholders' requirements	• Oral Presentation • Demonstration	• Oral recitation • Quiz	Julie A. Jacko and Andrew Sears (2019), "The HCI Handbook: Fundamentals, Evolving Technologies, and	Hybrid

	requirements c. Analyzing Tasks d. Dialogue notation and design	of HCI systems; and • Analyze and formulate tasks and dialogues of relevant HCI systems based on task analysis and dialogue design. (***IT04,IT03,IT05,IT06,IT07)***		• Presentation of Individual Output • Seatwork • Presentation of Output	Emerging Applications" Information Resources Management Association (2018), "Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications" Online Modules/LENS Laptop Projector Laboratory Room Library	
WEEK 12	**MIDTERM EXAMINATION**					
Week 13-17	**5. Groupware, Ubiquitous Computing, Augmented and Virtual Reality** a. Groupware and computer-supported collaborative work b. Ubiquitous Computing c. Virtual and Augmented Reality d. Hypertext, Multimedia and the World Wide Web.	At the end of the session, students are expected to: • Familiarize groupware and computer-supported collaborative work • Learn the basic of Virtual and Augmented Reality (***IT03,IT04,IT06,IT07)***	• Oral Presentation • Demonstration	• Presentation of Project Final output/	Julie A. Jacko and Andrew Sears (2019), "The HCI Handbook: Fundamentals, Evolving Technologies, and Emerging Applications" Information Resources Management Association (2018), "Human-Computer Interaction: Concepts, Methodologies, Tools, and Applications"	Hybrid

WEEK 18	**FINAL EXAMINATION**					

INTENDED LABORATORY ACTIVITIES (if applicable) - none
OTHER MAJOR COMPETENCIES OUTPUT (i.e., Reflection Paper/Portfolio/Film Review, etc. *if applicable*)
Aside from the major examinations, the student will be assessed at other times during the term by the following:

RUBRIC FOR ASSESSMENT TO BE USED FOR Major Competencies Outputs (MCOs) (if applicable)

Criteria	Excellent 16-20 pts	Good 11-15 pts	Satisfactory 6-10 pts	Unsatisfactory 1-5 pts	Score
Understanding of HCI Concepts	Demonstrates deep understanding of HCI principles and theories.	Shows a solid grasp of HCI fundamentals.	Demonstrates basic understanding of some HCI concepts.	Limited understanding of HCI concepts.	
Application of HCI Principles	Applies HCI principles effectively to design and usability scenarios.	Generally applies HCI principles appropriately.	Attempts to apply HCI principles but with inconsistencies.	Does not apply HCI principles effectively.	
Usability Evaluation Skills	Conducts comprehensive usability evaluations using appropriate methods/tools.	Conducts usability evaluations with reasonable effectiveness.	Demonstrates basic usability evaluation skills.	Shows significant deficiencies in usability evaluation skills.	
Design and	Develops well-considered interactive designs and	Creates functional and	Produces design concepts and prototypes with limited	Fails to develop meaningful design	

Prototyping	prototypes.	usable design prototypes.	functionality.	concepts or prototypes.	
Critical Thinking and Analysis	Demonstrates strong analytical skills in assessing HCI challenges.	Shows ability to analyze HCI problems effectively.	Provides basic analysis of HCI issues but lacks depth.	Analysis of HCI issues is superficial or incorrect.	
Collaboration and Teamwork	Collaborates effectively within teams on HCI projects and assignments.	Generally works well within a team setting.	Participates in team activities but with limited contribution.	Has difficulty working collaboratively within a team.	
Legend:	**91-120 pts.**	**61-90 pts.**	**31-60 pts.**	**5-30 pts.**	

Rubric for Oral Recitation

Criteria	Excellent 9-10 pts.	Good 8-9 pts.	Satisfactory 5-6 pts.	Unsatisfactory Below 5 pts.	Score /40
Content Mastery	Demonstrates a comprehensive understanding of the topic.	Provides accurate and relevant information.	Offers insightful analysis or interpretation, where applicable.	Fails to meet the minimum standards for the criterion.	
Delivery	Speaks clearly and audibly, with appropriate pace and volume.	Maintains good eye contact and body language.	Engages the audience through enthusiasm and confidence.	Fails to meet the minimum standards for the criterion.	
Organization	Presents ideas in a logical and coherent manner.	Uses effective transitions between points or sections.	Structures the recitation for clarity and comprehension.	Fails to meet the minimum standards for the criterion.	
Engagement	Demonstrates active participation and interaction.	Encourages audience involvement through questions or prompts.	Conveys enthusiasm and passion for the topic.	Fails to meet the minimum standards for the criterion.	
Legend	**31-40 pts**	**21-30 pts**	**11-20 pts**	**1-10 pts**	

Scoring:

Excellent (31-40 pts.): Represents an outstanding level of proficiency and effectiveness in all aspects of the criterion.

Good (21-30 pts.): Demonstrates above-average competency with minor areas for improvement.

Satisfactory (11-20 pts.): Meets the minimum requirements but may lack depth or consistency in execution.

Unsatisfactory (1-10 pts.): Fails to meet the minimum standards for the criterion.

COURSE POLICIES(on classroom norms, i.e., attendance, missed exams, academic integrity and medium of communication (provided that they don't run counter to existing policies)

- Students are expected to attend classes regularly. If the student accumulates absences for at least 20% of the total number of class hours, the student shall be considered dropped. Dropping should be done before the midterm examination to be considered officially dropped, otherwise, considered failed (except in cases found meritorious).

- The medium of communication shall be English, except in those courses where the use of the national language is necessary.
- Students must adhere to the mandates of academic integrity. Academic dishonesty (cheating, plagiarism, etc.) is taken very seriously. The minimum penalty for a violation of academic integrity is a failure (zero) for the assignment. When using course materials or other credible sources during class discussions and written requirements these must be cited properly.
- Use of electronics during class is not allowed. Turn off/mute/set to vibrate any electronic devices before class begins. For personal emergency, the student asks to be excused from the class to communicate outside of the classroom.
- Missing an examination is not allowed. In extreme cases such as death in the family, sickness or accident, a written evidence is required to make up a missed exam. No make-up quizzes shall be allowed.
- Students are encouraged to contact their professor for consultation and feedbacking at the following contact information
