A. Multiple Choice Questions (MCQs)

1. In C# Which namespace contains the **String class**?
   a. System.Text
   b. System.Collections
   c. System
   d. System.IO
2. Which keyword represents the **String class** in C#?
   a. text
   b. string
   c. char
   d. word
3. String in c# are:
   a. Mutable
   b. Immuntable
   c. Dynamic
4. What happens when a string value is modified?
   a. The original string changes
   b. A new string object is created
   c. The string is deleted
   d. The memory is reused
5. Which method converts a string to lowercase?
   a. ToLower()
   b. LowerCase()
   c. ConvertLower()
   d. ToSmall()
6. Which property returns the number of characters in a string?
   a. Size
   b. Length
   c. Count
   d. Capacity
7. Which method joins multiple strings together?
   a. Combine(0
   b. Join(0
   c. Merge()
   d. Append()
8. Which method checks whether a string contains a specific substring?
   a. Exists()
   b. Has()
   c. Contains()
   d. Find()
9. What does Trim() do?
   a. Removes spaces at the beginning only
   b. Removes spaces at the end only
   c. Removes spaces at the both ends
   d. Removes spaces inside the string
10. Which method replaces part of a string with another value?
    a. Substitute()
    b. Replace()
    c. Swap()
    d. Modify()
11. Which method returns a substring with another value?
    a. Substring()
    b. Sub()
    c. Split()
    d. Extract()
12. What does IndexOf() returns?
    a. The number of characters
    b. Position of a substring
    c. Boolean value
    d. New string
13. What is the output of "Hello".ToLower()?
    a. hello
    b. Hello
    c. HELLO
    d. error
14. Which method splits a string into an array?
    a. hello
    b. Hello
    c. HELLO
    d. error
15. Which method compares two strings?
    a. Compare()
    b. Match()
    c. Equal()
    d. Check()
16. Which symbol is used to declare a verbatim string literal?
    a. $
    b. 2
    c. #
    d. &
17. What is the main purpose of a verbatim string?
    a. Faster execution
    b. Ignore escape sequences
    c. Convert string to uppercase
    d. Reduce memory usage
18. Which example shows a correct verbatim string?
    a. string path = "C:\Folder4\File";
    b. string path = @"C:\Folder4\File";
    c. string path = @C:\Folder4\File;
    d. string path = #C:\Folder4\File;
19. Which example shows a correct verbatim string?
    a. "
    b. ""
    c. \"
    d. /"
20. Verbatim strings are commonly used for:
    a. File paths
    b. Numbers
    c. Arithmetic operations
    d. Boole
21. Which namespace contains **StringBuilder**?
    a. System
    b. System.Text
    c. System.Collections
    d. System.IO
22. StringBuilder objects are:
    a. Immutable
    b. Mutable
    c. Static
    d. Fixed
23. Which method adds text at the end of StringBuilder?
    a. Add()
    b. Append()
    c. Insert()
    d. Join()
24. Which method inserts text at a specific position?
    a. Insert()
    b. Add()
    c. Append()
    d. Place()
25. Which method removes characters from StringBuilder?
    a. Delete()
    b. Remove()
    c. Cut()
    d. Trim()
26. Which method replaces characters in StringBuilders?
    a. Replace()
    b. Update()
    c. Modify()
    d. Change()
27. What property shows the maximum number of characters StringBuilder can store?
    a. Length
    b. Capacity
    c. MaxSize
    d. Count
28. Which property indicates the current length of StringBuilder?
    a. Length
    b. Capacity
    c. Size
    d. Count
29. Which method converts StringBuilder to a string?
    a. Convert()
    b. ToString()
    c. Change()

d. Cast()

30. StringBuilder is most useful when:
    a. Strings never change
    b. Frequent string modifications occur
    c. Storing numbers
    d. Handling arrays
31. Which type is immutable?
    a. StringBuilder
    b. String
    c. List
    d. Array
32. Which type is mutable?
    a. String
    b. StringBuilder
    c. Char
    d. Int
33. Which is more efficient for repeated concatenation?
    a. String
    b. StringBuilder
    c. Char
    d. Boolean
34. What happens when concatenating many strings using +?
    a. One object is used
    b. Many new objects are created
    c. No memory is used
    d. Compilation fails
35. Which is typically faster in loops with many modifications?
    a. StringBuilder
    b. String
    c. Array
    d. Char
36. Which method is used with StringBuilder for adding text?
    a. Append()
    b. Add()
    c. Combine()
    d. Link()
37. String is best used when:
    a. Frequent modifications
    b. Fixed text values
    c. Large loops
    d. Dynamic buffers
38. Which namespace contains the List<T> class?
    a. System.Collections.Generic
    b. System.Text
    c. System.IO
    d. System.Linq
39. Which method adds an element to a List?
    a. Insert()
    b. Add()
    c. Append()
    d. Put()
40. Which property returns the number of items in a List?
    a. Size
    b. Length
    c. Count
    d. Capacity
41. Which method removes an item from a List?
    a. Delete()
    b. Remove()
    c. Clear()
    d. Cut()
42. Which method checks if an element exists in a List?
    a. RemoveAll()
    b. DeleteAll()
    c. Clear()
    d. Empty()
43. Which method checks if an element exists in a List?
    a. Exists()
    b. Contains()
    c. Find()
    d. Check()
44. Which method inserts an element at a specific position?
    a. Exist()
    b. Contains()
    c. Find()
    d. Check()
45. Which property defines the number of elements the List can hold before resizing?
    a. Length
    b. Count
    c. Capacity
    d. Size
46. Which method sorts the elements of a List?
    a. Arrange()
    b. Sort()
    c. Order()
    d. Organize()
47. Which method reverses the order of elements in a List?
    a. Flip()
    b. Reverse()
    c. Turn()
    d. Swap()
48. Which method finds the index of an element in a List?
    a. IndexOf()
    b. FindIndex()
    c. Search()
    d. Locate()
49. What does List<T> allow?
    a. Fixed size collection
    b. Dynamic collection
    c. Only numbers
    d. Only strings
50. Which of the following is a valid List declaration?
    a. List number = new List()
    b. List<int> numbers = new List<int>();
    c. list numbers<int>();
    d. numbers List<int>();

B. Fill-in-the-Blank Code Questions with Multiple Choices

51. _____ message = "Hello World";
    a. text
    b. string
    c. char
    d. varstring
52. string text = "HELLO";
    Console.WriteLine(text._____());
    a. ToUpper
    b. ToLower
    c. LowerCase
    d. ConvertLower

53. string name = "Programming";
    Console.WriteLine(name._____);
    a. Size
    b. Count
    c. Length
    d. Capacity
54. string word = "code";
    Console.WriteLine(word._____());
    a. Toupper
    b. UpperCase
    c. ConvertUpper
    d. MakeUpper
55. string sentence = "The cat is sleeping";
    Console.WriteLine(sentence._____("cat"));
    a. Exists
    b. Find
    c. Contains
    d. Search
56. string text = "The dog is here";
    text = text._____("dog", "cat");
    a. Change
    b. Replace
    c. Modify
    d. Convert
57. string value = " Hello ";
    Console.WriteLine(value._____());
    a. Remove
    b. Trim
    c. Strip
    d. Cut
58. string word = "Computer";
    Console.WriteLine(word._____(0,4));
    a. Extract
    b. Substring

c. Split
d. Slice

59. string data = "apple,banana,orange";
string[] fruits = data._____(',');
a. Break
b. Slice
c. Split
d. Divide

60. string[] words = {"I","love","C#"};
string sentence = string._____(" ", words);
a. Join
b. Combine
c. Merge
d. Connect

61. string path = _____"C:\Users\Admin\Documents";
a. $
b. @
c. #
d. &

62. string file = _____"C:\Folder\MyFile.txt";
a. $
b. @
c. #
d. !

63. string quote = @"She said ""_____"" ";
a. Hello
b. “Hello”
c. “”Hello””
d. /Hello/

64. using _____;
a. System.IO
b. System.Collections
c. System.Text
d. System.Linq

65. _____ sb = new StringBuilder();
a. String
b. StringBuilder
c. Builder
d. TextBuilder

66. sb._____("Hello ");
a. Add
b. Append
c. Insert
d. Join

67. sb._____(0, "Start ");
a. Add
b. Append
c. Insert
d. Place

68. sb._____(0, 5);
a. Delete
b. Cut
c. Remove
d. Clear

69. string result = sb._____();
a. Convert
b. ToString
c. Change
d. Stringify

70. _____sb = new StringBuilder();
a. String
b. StringBuilder
c. Char
d. Text

71. string result = str1 _____ str2;
a. &
b. +
c. *
d. :

72. List<int> numbers = new _____();
a. List
b. List<int>
c. ArrayList
d. IntList

73. numbers._____(10);
a. Insert
b. Add
c. Append
d. Put

74. Console.WriteLine(numbers._____);
a. Length
b. Size
c. Count
d. Capacity

75. Console.WriteLine(numbers.___(5));
a. Exists
b. Contains
c. Find
d. Search
