CAGAYAN STATE UNIVERSITY
Aparri Campus
College of Information and Computing Sciences
2nd Semester, 2025-2026

Term:	*Prelims*	**Date of Examination:**	
Subject Code:	*IT 322*	**Score**	
Student Name:		**Year and Section:**	

A. Multiple Choice Questions (MCQ)

1. What does mobile computing primarily allow users to do?
   A. Use computers only in offices
   B. Access and process data anytime and anywhere
   C. Replace desktop computers
   D. Use the internet without electricity

2. Which device is considered part of mobile computing?
   A. Desktop computer
   B. Mainframe computer
   C. Smartphone
   D. Server

3. Which characteristic of mobile computing refers to ease of carrying devices?
   A. Connectivity
   B. Interactivity
   C. Portability
   D. Context-awareness

4. Which characteristic allows devices to detect location and orientation?
   A. Portability
   B. Mobility
   C. Context-awareness
   D. Connectivity

5. Which is NOT a characteristic of mobile computing?
   A. Portability
   B. Connectivity
   C. Context-awareness
   D. Centralization

6. Which of the following is a component of mobile computing?
   A. Desktop software
   B. Mobile devices
   C. Supercomputers
   D. Wired-only networks

7. Which belongs to mobile communication?
   A. Bluetooth
   B. Monitor
   C. Printer
   D. Keyboard

8. Android and iOS belong to which mobile computing component?
   A. Mobile hardware
   B. Mobile communication
   C. Mobile software
   D. Mobile database

9. Mobile applications are best described as:
   A. Programs for desktop computers
   B. Software designed for mobile devices
   C. Software for servers only
   D. Offline-only programs

10. Which is an example of a social media mobile app?
    A. Google Docs
    B. Calculator
    C. Instagram
    D. Flashlight

11. Shopee and Lazada are examples of:
    A. Utility apps
    B. Productivity apps
    C. E-commerce apps
    D. Educational apps

12. Which app category includes Mobile Legends?
    A. Utility
    B. Educational
    C. Game
    D. Productivity

13. Which is NOT a type of mobile application?
    A. Social media
    B. Entertainment
    C. E-commerce
    D. Mainframe

14. Mobile apps are designed mainly for:
    A. Keyboard input
    B. Mouse input
    C. Touch input

D. Voice-only input

15. Which sensor allows a mobile app to detect location?
    A. Camera
    B. Accelerometer
    C. GPS
    D. Gyroscope

16. Which operating systems are used by mobile devices?
    A. Windows XP and DOS
    B. Linux and UNIX
    C. Android and iOS
    D. macOS only

17. Mobile app development is the process of:
    A. Designing websites only
    B. Creating apps for mobile devices
    C. Repairing mobile phones
    D. Installing operating systems

18. Which programming languages are commonly used for Android native apps?
    A. Python and Ruby
    B. Java and Kotlin
    C. Swift and Objective-C
    D. C and C++ only

19. Swift is primarily used for developing apps on which platform?
    A. Android
    B. Windows
    C. iOS
    D. Linux

20. Native applications are developed for:
    A. All platforms at once
    B. One specific platform
    C. Web browsers only
    D. Desktop computers

21. Which is an advantage of native applications?
    A. Slower performance
    B. Limited device access
    C. Better performance
    D. One codebase only

22. Which is a disadvantage of native applications?
    A. Fast performance
    B. Better user experience
    C. Higher development cost
    D. Full device access

23. Hybrid applications are built using:
    A. Assembly language
    B. Web technologies
    C. Machine code
    D. C only

24. HTML, CSS, and JavaScript are mainly used in:
    A. Native-only apps
    B. Hybrid applications
    C. Hardware development
    D. Operating systems

25. Which is an example of a hybrid or cross-platform framework?
    A. Android Studio
    B. Xcode
    C. Flutter
    D. DOS

26. One major advantage of hybrid apps is:
    A. Platform-specific code
    B. One codebase for multiple platforms
    C. Higher cost
    D. Slower development

27. The mobile development lifecycle refers to:
    A. Device replacement cycle
    B. App usage period
    C. Step-by-step app development process
    D. Network installation

28. Which phase comes FIRST in the mobile development lifecycle?
    A. Testing
    B. Deployment
    C. Planning
    D. Maintenance

29. Wireframes are created during which phase?
    A. Planning
    B. Design
    C. Development
    D. Maintenance

30. Writing code belongs to which phase?
    A. Planning
    B. Design
    C. Development
    D. Testing

31. Functional and usability testing are done during:
    A. Planning
    B. Development
    C. Testing
    D. Deployment

32. Publishing an app to Google Play Store happens during:
    A. Testing
    B. Design
    C. Deployment
    D. Maintenance

33. Bug fixes and updates belong to which phase?
    A. Planning
    B. Development
    C. Deployment
    D. Maintenance

34. Front-end refers to:
    A. Server-side logic
    B. Database management
    C. User-visible part of the app
    D. Network configuration

35. Which is part of the front-end?
    A. Database tables
    B. API servers
    C. Buttons and menus
    D. Cloud storage

36. HTML is mainly used for:
    A. Styling
    B. Interactivity
    C. Structure
    D. Animation

37. CSS is mainly responsible for:
    A. Structure
    B. Design and layout
    C. Data storage
    D. Security

38. JavaScript is mainly used for:
    A. Styling pages
    B. Structuring content
    C. Interactivity
    D. Database creation

39. React, Vue, and Angular are examples of:
    A. Programming languages
    B. Databases
    C. Frameworks
    D. Operating systems

40. The mobile front-end workflow starts with:
    A. Coding
    B. Deployment
    C. Requirement analysis
    D. Testing

41. Low-fidelity sketches of screens are called:
    A. Prototypes
    B. Wireframes
    C. Mockups
    D. Layouts

42. Figma and Adobe XD are used mainly for:
    A. Coding
    B. Testing
    C. UI/UX design
    D. Deployment

43. Which step connects the front-end to the back-end?
    A. Wireframing
    B. Coding UI
    C. Integrating APIs
    D. Optimization

44. Checking responsiveness belongs to:
    A. Planning
    B. Testing the UI
    C. Deployment
    D. Design

45. Improving speed and reducing file size is part of:
    A. Optimization
    B. Testing
    C. Planning
    D. Wireframing

46. Releasing the app to the app store is called:
    A. Maintenance
    B. Optimization
    C. Deployment
    D. Development

47. Which skill is emphasized in front-end development?
    A. Database administration
    B. User interaction design
    C. Network routing
    D. Server configuration

48. Which framework is commonly used for mobile front-end development?
    A. Laravel
    B. Flutter
    C. MySQL
    D. Apache

49. Mobile front-end focuses mainly on:
    A. Security rules
    B. User experience
    C. Server speed
    D. Network topology

50. Which best describes the goal of mobile computing?
    A. Replace laptops
    B. Centralize data
    C. Enable computing on the move
    D. Eliminate wired networks

Prepared by:

_____
Alber A. Canlas, Jr.
Subject Teacher

Checked and Approved by:

_____
Leo P. Paliuanan, PhD
Program Coordinator

Noted by:

_____
Engr. Julieta B. Babas, DIT
Dean, College of Information and Computing Sciences
